PROFESSIONAL SUMMARY

BI Engineer and data professional with experience delivering end-to-end analytics solutions across data ingestion, ETL/ELT, Lakehouse and medallion architectures, dimensional modeling, semantic models, DAX, Power BI development, performance optimization, embedded analytics, predictive analytics, and governed AI. Experienced in presenting real-time insights to executive stakeholders, leading cloud analytics adoption, strengthening deployment and version-control practices, and building trusted reporting products for enterprise users.

TECHNICAL SKILLS

Business Intelligence: Power BI, DAX, semantic modeling, Row-Level Security, embedded analytics, dashboard development, performance tuning

Data Engineering: Microsoft Fabric, Databricks, Azure, Lakehouse, medallion architecture, ETL/ELT, data pipelines, orchestration, Kafka

Languages and Tools: Python, PySpark, SQL, Git, Azure DevOps, Excel, Tabular Editor 3

Analytics and AI: Predictive analytics, machine learning, applied statistics, data visualization, governed AI, evidence-based narratives, validation and reconciliation

Web: HTML, CSS, JavaScript, responsive design

PROFESSIONAL EXPERIENCE

BI Engineer / Developer III | Willis Towers Watson

December 2025 - Present

- Led the team transition from traditional BI tools to Microsoft Fabric, establishing practical standards for adoption, governance, and scalable analytics delivery.
- Strengthened deployment processes through structured Git version control and Azure DevOps practices, improving change traceability, release control, and team collaboration.
- Facilitated adoption of a medallion architecture, improving data quality, consistency, and analytics readiness from ingestion through reporting.
- Helped prepare the team for responsible AI adoption by promoting grounded data, reusable evidence layers, validation controls, source traceability, and safe fallbacks when evidence is incomplete.

Data Analytics Engineer | Pru Life UK

July 2024 - December 2025

- Presented real-time dashboards and actionable insights directly to the CEO, CTO, and Data and AI Lead, supporting data-driven decisions across departments.
- Created the company central enterprise dashboard, serving as a trusted data source for analysts, data scientists, and teams across multiple departments.
- Spearheaded end-to-end analytics projects from ingestion and transformation through dashboard development and stakeholder presentation.
- Supported migration from legacy reporting tools to Power BI and collaborated across teams to embed Power BI into the internal site for authorized employee-ID-based access without individual Power BI accounts.

Data Analyst | EasyCall Philippines Inc.

November 2022 - July 2024

- Expanded the company service offering by introducing machine learning and predictive analytics, helping teams and clients forecast outcomes using historical data.
- Designed and maintained scalable data pipelines to Lakehouse environments, integrating multiple systems and supporting self-service analytics and enterprise reporting.
- Created and presented dynamic Power BI dashboards with Row-Level Security, providing secure role-based visibility for stakeholders.
- Contributed to an estimated 20% increase in company revenue by helping develop and introduce predictive analytics as an additional client service.

Data Analyst | Freelance

January 2021 - November 2022

- Translated client business questions into reporting requirements, practical analyses, and decision-ready dashboards.
- Cleaned, combined, and validated spreadsheet and client-provided data, improving the reliability of recurring reports.
- Built reusable dashboards and reporting templates that reduced manual preparation and clarified performance and operational trends.

Junior Front-end Web Developer Intern | MBC

October 2020 - January 2021

- Converted approved layouts and specifications into responsive web pages using HTML, CSS, and JavaScript under senior-developer guidance.
- Supported website maintenance by fixing visual defects, adjusting components, and improving consistency across common screen sizes and browsers.
- Collaborated with designers and developers during reviews, applied feedback to assigned features, and documented changes for maintainability.

EDUCATION

Master of Applied Statistics, specialization in Data Analytics

Polytechnic University of the Philippines | February 2025 - March 2026

- Graduate studies attended; program not completed.

Bachelor of Information Technology

Pamantasan ng Lungsod ng Muntinlupa | August 2020 - August 2022

- Muntinlupa ACE Scholar for two consecutive years.

Associate of Computer Technology

Pamantasan ng Lungsod ng Muntinlupa | August 2018 - May 2020

- Muntinlupa ACE Scholar.
- PLMun Taekwondo Marshal.

Senior High School

Lyceum of Alabang | July 2016 - May 2018

- Student Member, Royal Institute of Management in Singapore.
- NC II - Computer Systems Servicing passer.

TRAINING, CERTIFICATIONS, AND ADDITIONAL EXPERIENCE

- 2024 - Passed the Armed Forces of the Philippines Service Aptitude Test (AFPSAT).
- 2023 - Data Science Math Skills.
- 2023 - Eskwelabs Data Analytics Bootcamp.
- 2022 - Completed the four-week Data Analytics for the Public Sector course by the Department of Information and Communications Technology.
- Completed "Analyze Data with Python" training by the Department of Information Technology.
- Completed 300 hours of Data Analytics with Python coursework.
- 2021 - Continuous learning in SQL database management.
- 2021 - Developed an archiving system for Cupang Elementary School.
